

Environmental Policy

JCW Group has total respect for our environment. We, our employees and others who work for us directly, or on a contract or sub-contract basis, will work to minimise waste, prevent pollution and conserve energy.

All materials and wastes will be handled in strict compliance with all relevant requirements including: storage, labelling, use, and disposal, reporting, training and record-keeping.

In ensuring that these objectives are met JCW Group are committed to:

- Ensuring that all legislative requirements are identified and met.
- Implementing a continuous programme of environmental improvements through an annual process of setting closely monitored objectives and targets.
- Maintaining systems, which address the requirements of ISO 14001:2004
- Promoting environmental awareness through training and education and communicating our objectives to all our employees and others who may work for us.
- Reducing waste and energy consumption.
- Applying the best practicable means to reduce emissions to air, land and water caused by our activities.
- Including environmental considerations in all business decisions.
- Developing relationships with our suppliers that emphasise continuous improvement in environmental performance.
- Monitoring our environmental performance by regular auditing of the activities of the organisation.
- Making this Policy publicly available.

This Policy will be formally reviewed, and updated as necessary, on an annual basis.
